

Q#	Correct Answer	Key Vocabulary Word	Context/Clue Type
1	B	Skeptical	Doubt regarding unverified libraries
2	C	Disparate	Unmatched, fundamentally different formats
3	B	Deleterious	Negative result of crashing platforms
4	C	Aberration	A temporary departure from normal performance
5	C	Obfuscate	Intentionally rendering code unreadable
6	B	Volatile	Temporary state of clearing out upon power loss
7	A	Convolutd	Overly complex execution paths
8	C	Incipient	Early, beginning stages of a system failure
9	B	Resilient	Recovering quickly from catastrophic events
10	D	Obsolete	Outdated or no longer functional APIs
11	A	Pragmatic	Realistic, practical step-by-step scaling
12	B	Fastidious	Highly attentive to logs and edge cases
13	C	Fluctuate	Unpredictable rise and fall of web traffic
14	B	Integral	Essential/necessary part of a system
15	C	Sporadic	Irregular, scattered data time-outs
16	C	Ambiguous	Vague, leaving developers guessing
17	B	Rhetoric	Empty corporate talk vs. concrete data

Q#	Correct Answer	Key Vocabulary Word	Context/Clue Type
18	C	Terse	Abrupt, short, single-sentence response
19	B	Emphasize	Prominently highlighting achievements
20	B	Deference	Professional respect to keep partnership intact
21	A	Explicit	Stated clearly and in detail vs. implicit hinting
22	A	Alacrity	Brisk and cheerful readiness to adapt
23	C	Candor	Complete honesty regarding structural faults
24	B	Objective	Unbiased data metrics over personal opinion
25	B	Hackneyed	Overused, unoriginal buzzwords
26	C	Succinct	Brief and to the point under three minutes
27	C	Verbose	Wordy, causing a reader to lose interest
28	B	Inundated	Overwhelmed with incoming error reports
29	C	Curtail	Cutting down or reducing expenses
30	B	Cogent	Logical, persuasive, and data-backed argument
31	C	Mitigate	Lessening severity of potential data losses
32	B	Viable	Capable of working successfully
33	C	Benchmark	Reference standard for software speed metrics
34	B	Quixotic	Idealistic, completely unrealistic timelines

Q#	Correct Answer	Key Vocabulary Word	Context/Clue Type
35	B	Synchronize	Making schedules align perfectly together
36	C	Paramount	Supreme, top-tier critical importance
37	A	Unprecedented	Never witnessed before in corporate history
38	C	Assimilate	Learning and taking in institutional knowledge
39	B	Complacent	Overconfident, leading to a drop in innovation
40	B	Expedite	Speeds up processing of emergency orders
41	D	Liability	Legal and financial vulnerability risk exposure
42	A	Oversight	Unintentional structural omission
43	B	Imperious	Domineering, intimidating management style
44	C	Empirical	Hard data metrics over clean design theory
45	B	Surpass	Exceeding output capabilities of older models
46	B	Requisite	Mandatory, required access permissions
47	B	Catalyst	Event causing a sharp drop in deployment time
48	C	Impediment	Hindrance/blocker preventing migration plans
49	B	Scrupulous	Ethical and detailed protection of user data
50	B	Consensus	General agreement across the board
