

✱ **Select the option that best improves the bold part**

(1) Given below are four sentences. Rearrange them to form a logical and meaningful paragraph.

- (1) Most Indian cities still treat stormwater as waste to be flushed out as fast as possible.
- (2) The result is a network of drains built only to carry water away, never to hold it.
- (3) Restoring even a fraction of these would absorb the peak load the drains cannot.
- (4) Yet the same cities once held hundreds of tanks and ponds that did exactly that.

Options: (1) 1324 (2) 1243 (3) 2143 (4) 4132

2. Given below are four sentences. Rearrange them to form a logical and meaningful paragraph.

- (1) Every unnecessary prescription adds selective pressure that favours the hardest bacteria.
- (2) The problem, then, lies less in the laboratory than in the pharmacy and the clinic.
- (3) Resistance is not a future threat but a present one, already killing more people each year than malaria.
- (4) Those survivors go on to found colonies the same drug can no longer touch.

Options: (1) 3142 (2) 1432 (3) 3412 (4) 2314

(3) Given below are four sentences. Rearrange them to form a logical and meaningful paragraph.

- (1) Translation, in other words, is not a service to the original but a second act of authorship.
- (2) A translated novel arrives in English carrying the syntax of a language most of its new readers cannot hear.
- (3) That silent grammar shapes everything from sentence rhythm to the placing of emphasis.
- (4) What the translator must decide is how much of it to let through.

Options: (1) 1234 (2) 2431 (3) 3241 (4) 2341

(4) Given below are four sentences. Rearrange them to form a logical and meaningful paragraph.

- (1) In practice, however, the algorithm that assigns the work also fixes the pay, the route and the penalty for refusal.
- (2) Platform companies describe their riders as independent partners rather than employees.
- (3) Autonomy, when an app dictates all three, exists only on paper.
- (4) Whether that description holds is not a semantic quibble: it decides who bears the cost of injury, fuel and idle time.

Options: (1) 2143 (2) 4213 (3) 2413 (4) 1324

5. Given below are four sentences. Rearrange them to form a logical and meaningful paragraph.

- (1) Museums in Europe hold thousands of objects removed from the colonies in the nineteenth century.
- (2) Curators who resist tend to argue about conservation, security and legal title.
- (3) Increasingly, the countries of origin are asking for them back.
- (4) The claim, however, is rarely about a single object; it is about who is permitted to narrate a past.

Options: (1) 1324 (2) 1234 (3) 3124 (4) 1342

6. Given below are four sentences. Rearrange them to form a logical and meaningful paragraph.

- (1) The loss is not only aesthetic.
- (2) Two-thirds of Europeans can no longer see the Milky Way from where they live.
- (3) Shielding fixtures downward, it turns out, restores both the view and the cues at almost no cost.
- (4) Migratory birds, sea turtles and nocturnal insects navigate by signals that streetlights overwrite.

Options: (1) 1243 (2) 2143 (3) 2413 (4) 4213

7. Given below are four sentences. Rearrange them to form a logical and meaningful paragraph.

- (1) A test everyone passes tells the examiner nothing about who has learned what.
- (2) Difficulty, in assessment, is not cruelty but information.
- (3) The same is true of one that everyone fails.
- (4) Useful items are those a prepared candidate answers and an unprepared one does not.

Options: (1) 1234 (2) 2314 (3) 1324 (4) 2134

8. Given below are four sentences. Rearrange them to form a logical and meaningful paragraph.

- (1) Free electricity for pumps was meant to protect farmers from the moneylender.
- (2) The subsidy, in effect, now pays for the destruction of the resource it was built around.
- (3) It has ended up protecting them from the price of water instead.
- (4) Where a well once reached water at forty feet, borewells now go past four hundred.

Options: (1) 1234 (2) 3142 (3) 1342 (4) 1432

9. Given below are four sentences. Rearrange them to form a logical and meaningful paragraph.

- (1) Students trained on feeds arrive expecting a text to yield on first contact.
- (2) When it does not, they conclude that the book is badly written rather than that the reading is unfinished.
- (3) Comprehension, unlike scrolling, does not improve with speed.
- (4) Reading a difficult page twice is not a sign of failure but the ordinary cost of thinking.

Options: (1) 3124 (2) 1234 (3) 3142 (4) 1324

10. Given below are four sentences. Rearrange them to form a logical and meaningful paragraph.

- (1) Within a decade the trapped damp has done what two centuries of weather could not.
- (2) A lime-plastered wall breathes; a cement-rendered one traps the moisture it cannot release.
- (3) Contractors, working to modern specifications, replace lime mortar with cement.
- (4) Most of the damage to old monuments in India is done not by neglect but by repair.

Options: (1) 4231 (2) 4321 (3) 3421 (4) 2341

✱ **Select the option that best improves the bold part**

(1) Given below are four sentences. Rearrange them to form a logical and meaningful paragraph.

- (1) Most Indian cities still treat stormwater as waste to be flushed out as fast as possible.
- (2) The result is a network of drains built only to carry water away, never to hold it.
- (3) Restoring even a fraction of these would absorb the peak load the drains cannot.
- (4) Yet the same cities once held hundreds of tanks and ponds that did exactly that.

Options: (1) 1324 (2) **1243** (3) 2143 (4) 4132

Reason: 1 states the practice and 2 gives its consequence ("The result"). 4 turns with "Yet" to the tanks and ponds that "did exactly that", and "these" in 3 can refer only to those tanks and ponds, so 3 must close.

2. Given below are four sentences. Rearrange them to form a logical and meaningful paragraph.

- (1) Every unnecessary prescription adds selective pressure that favours the hardiest bacteria.
- (2) The problem, then, lies less in the laboratory than in the pharmacy and the clinic.
- (3) Resistance is not a future threat but a present one, already killing more people each year than malaria.
- (4) Those survivors go on to found colonies the same drug can no longer touch.

Options: (1) **3142** (2) 1432 (3) 3412 (4) 2314

Reason: 3 establishes the scale of the problem and 1 supplies the mechanism. "Those survivors" in 4 refers to the hardiest bacteria of 1, so 4 must follow it directly; "then" in 2 marks the concluding inference.

(3) Given below are four sentences. Rearrange them to form a logical and meaningful paragraph.

- (1) Translation, in other words, is not a service to the original but a second act of authorship.
- (2) A translated novel arrives in English carrying the syntax of a language most of its new readers cannot hear.
- (3) That silent grammar shapes everything from sentence rhythm to the placing of emphasis.
- (4) What the translator must decide is how much of it to let through.

Options: (1) 1234 (2) 2431 (3) 3241 (4) **2341**

Reason: 2 introduces the syntax new readers cannot hear; "That silent grammar" in 3 refers to it, and "it" in 4 continues the same referent. "In other words" in 1 marks the closing restatement.

(4) Given below are four sentences. Rearrange them to form a logical and meaningful paragraph.

- (1) In practice, however, the algorithm that assigns the work also fixes the pay, the route and the penalty for refusal.
- (2) Platform companies describe their riders as independent partners rather than employees.
- (3) Autonomy, when an app dictates all three, exists only on paper.
- (4) Whether that description holds is not a semantic quibble: it decides who bears the cost of injury, fuel and idle time.

Options: (1) 2143 (2) 4213 (3) **2413** (4) 1324

Reason: 2 gives the description and "that description" in 4 refers to it. "In practice, however" in 1 supplies the contrary reality, and "all three" in 3 counts the pay, route and penalty named in 1.

5. Given below are four sentences. Rearrange them to form a logical and meaningful paragraph.

- (1) Museums in Europe hold thousands of objects removed from the colonies in the nineteenth century.
- (2) Curators who resist tend to argue about conservation, security and legal title.
- (3) Increasingly, the countries of origin are asking for them back.
- (4) The claim, however, is rarely about a single object; it is about who is permitted to narrate a past.

Options: (1) **1324** (2) 1234 (3) 3124 (4) 1342

Reason: 1 sets out the holdings and "them" in 3 refers to the objects. 2 gives the curators' technical counter-arguments, which the "however" of 4 answers, so 4 closes.

6. Given below are four sentences. Rearrange them to form a logical and meaningful paragraph.

- (1) The loss is not only aesthetic.
- (2) Two-thirds of Europeans can no longer see the Milky Way from where they live.
- (3) Shielding fixtures downward, it turns out, restores both the view and the cues at almost no cost.
- (4) Migratory birds, sea turtles and nocturnal insects navigate by signals that streetlights overwrite.

Options: (1) 1243 (2) **2143** (3) 2413 (4) 4213

Reason: 2 states the fact; "The loss" in 1 refers to it and promises something beyond the aesthetic, which 4 supplies. 3 offers the remedy and names "both the view and the cues", so it can come only after 2 and 4.

7. Given below are four sentences. Rearrange them to form a logical and meaningful paragraph.

- (1) A test everyone passes tells the examiner nothing about who has learned what.
- (2) Difficulty, in assessment, is not cruelty but information.
- (3) The same is true of one that everyone fails.
- (4) Useful items are those a prepared candidate answers and an unprepared one does not.

Options: (1) 1234 (2) 2314 (3) 1324 (4) **2134**

Reason: 2 is the thesis and 1 the first illustration. "The same is true of one" in 3 needs the test of 1 as its antecedent, and 4 states the criterion that follows.

8. Given below are four sentences. Rearrange them to form a logical and meaningful paragraph.

- (1) Free electricity for pumps was meant to protect farmers from the moneylender.
- (2) The subsidy, in effect, now pays for the destruction of the resource it was built around.
- (3) It has ended up protecting them from the price of water instead.
- (4) Where a well once reached water at forty feet, borewells now go past four hundred.

Options: (1) 1234 (2) 3142 (3) **1342** (4) 1432

Reason: 1 gives the original intention and "It has ended up ... instead" in 3 reverses it. 4 supplies the physical evidence of that reversal, and "in effect" in 2 draws the conclusion.

9. Given below are four sentences. Rearrange them to form a logical and meaningful paragraph.

- (1) Students trained on feeds arrive expecting a text to yield on first contact.
- (2) When it does not, they conclude that the book is badly written rather than that the reading is unfinished.
- (3) Comprehension, unlike scrolling, does not improve with speed.
- (4) Reading a difficult page twice is not a sign of failure but the ordinary cost of thinking.

Options: (1) **3124** (2) 1234 (3) 3142 (4) 1324

Reason: 3 is the thesis and 1 describes the students it concerns. "When it does not" in 2 depends on the expectation stated in 1, and 4 closes with the corrective.

10. Given below are four sentences. Rearrange them to form a logical and meaningful paragraph.

- (1) Within a decade the trapped damp has done what two centuries of weather could not.
- (2) A lime-plastered wall breathes; a cement-rendered one traps the moisture it cannot release.
- (3) Contractors, working to modern specifications, replace lime mortar with cement.
- (4) Most of the damage to old monuments in India is done not by neglect but by repair.

Options: (1) 4231

(2) 4321

(3) 3421

(4) 2341

Reason: 4 is the thesis and 3 names the repair practice. 2 explains why cement harms, and "the trapped damp" in 1 must follow immediately from "traps the moisture" in 2.
