

✱ **Contextual Vocabulary & Semantics**

Select the correct option for each question.

1. Although the company enjoyed substantial revenue growth, its inability to (A) _____ operational inefficiencies continued to (B) _____ profitability, leaving its long-term financial (C) _____ increasingly (D) _____.
 1. (A) rectify (B) constrain (C) sustainability (D) precarious
 2. (A) amplify (B) enhance (C) liquidity (D) robust
 3. (A) conceal (B) stimulate (C) viability (D) certain
 4. (A) replicate (B) stabilize (C) productivity (D) advantageous
2. The manager's proposal was initially met with (A) _____ from senior executives, who considered the projected benefits too (B) _____ to justify the substantial investment and feared that the initiative could (C) _____ organizational (D) _____.
 1. (A) enthusiasm (B) tangible (C) strengthen (D) cohesion
 2. (A) skepticism (B) speculative (C) disrupt (D) equilibrium
 3. (A) consensus (B) measurable (C) improve (D) efficiency
 4. (A) approval (B) evident (C) facilitate (D) coordination
3. To remain competitive, organizations must not merely (A) _____ emerging technologies but also (B) _____ their implications, anticipate potential (C) _____, and incorporate them into a coherent strategic (D) _____.
 1. (A) reject (B) minimize (C) opportunities (D) obstacle
 2. (A) imitate (B) overlook (C) advantages (D) hesitation
 3. (A) postpone (B) exaggerate (C) solutions (D) decline
 4. (A) adopt (B) evaluate (C) disruptions (D) framework
4. The research findings challenge the widely held assumption that higher salaries automatically (A) _____ employee motivation, suggesting instead that recognition and autonomy may have a more (B) _____ influence on workplace (C) _____ and long-term (D) _____.
 1. (A) undermine (B) negligible (C) dissatisfaction (D) stagnation
 2. (A) restrict (B) superficial (C) productivity (D) absenteeism
 3. (A) enhance (B) profound (C) engagement (D) retention
 4. (A) distort (B) temporary (C) compliance (D) resistance
5. The entrepreneur's ability to (A) _____ limited resources, (B) _____ strategic partnerships, and (C) _____ market uncertainty enabled the startup to achieve remarkable (D) _____ despite intense competition.
 1. (A) squander (B) dissolve (C) intensify (D) vulnerability
 2. (A) leverage (B) forge (C) navigate (D) growth
 3. (A) deplete (B) terminate (C) disregard (D) stability
 4. (A) conceal (B) undermine (C) eliminate (D) decline

6. Effective workplace (A) _____ enables employees to (B) _____ ideas clearly and build professional (C) _____ with their (D) _____.

1. (A) communication (B) express (C) relationships (D) colleagues
2. (A) decoration (B) hide (C) arguments (D) competitors
3. (A) hesitation (B) avoid (C) confusion (D) customers
4. (A) isolation (B) exchange (C) conflicts (D) managers

7. The sudden decline in sales prompted the management to (A) _____ the underlying causes, (B) _____ its pricing strategy, and (C) _____ measures to regain customer confidence.

1. (A) overlook (B) preserve (C) abandon
2. (A) speculate (B) maintain (C) postpone
3. (A) investigate (B) reassess (C) implement
4. (A) conceal (B) simplify (C) undermine

8. The company's expansion into international markets required it to (A) _____ cultural differences, (B) _____ its communication practices, and (C) _____ its approach to local consumers.

1. (A) disregard (B) standardize (C) restrict
2. (A) navigate (B) adapt (C) tailor
3. (A) eliminate (B) preserve (C) imitate
4. (A) exaggerate (B) simplify (C) generalize

9. The manager's decision to _____ the conflicting opinions rather than _____ them demonstrated his ability to maintain organizational _____.

1. (A) intensify (B) resolve (C) conflict
2. (A) provoke (B) accommodate (C) tension
3. (A) exaggerate (B) negotiate (C) disagreement
4. (A) reconcile (B) suppress (C) harmony

10. Effective crisis management requires leaders to (A) _____ credible information, (B) _____ uncertainty among stakeholders, and (C) _____ decisive measures without appearing (D) _____.

1. (A) disseminate (B) mitigate (C) implement (D) impulsive
2. (A) suppress (B) intensify (C) postpone (D) transparent
3. (A) distort (B) eliminate (C) reconsider (D) accountable
4. (A) conceal (B) generate (C) abandon (D) methodical

✱ **Participle Forms**

Select the correct option for each question.

11. The hikers reached the _____ (A) village after walking through a _____ (B) forest for several hours.

1. (A) isolated (B) dense
2. (A) isolating (B) density
3. (A) isolate (B) densifying
4. (A) isolation (B) densely

12. The _____ (A) manuscript, _____ (B) for centuries in a monastery, revealed details about a forgotten civilization.

1. (A) preserving (B) hidden
2. (A) preserved (B) having hidden
3. (A) preserved (B) hidden
4. (A) preserving (B) having been hidden

13. _____ (A) by the unexpected announcement, the audience remained _____ (B) throughout the ceremony.

1. (A) Surprised (B) silent
2. (A) Surprising (B) silence
3. (A) Shock (B) silently
4. (A) Astonishment (B) silenced

14. _____ (A) the potential danger, the climbers proceeded cautiously along the _____ (B) path.

1. (A) Recognition (B) narrowing
2. (A) Acknowledged (B) narrowness
3. (A) Awareness (B) narrowed
4. (A) Recognizing (B) narrow

15. After the earthquake struck the region, thousands of residents were left (A) _____ by the sudden destruction and struggled to cope with the (B) _____ conditions around them.

1. (A) fascinated (B) improving
2. (A) encouraged (B) recovering
3. (A) devastated (B) deteriorating
4. (A) relieved (B) flourishing

16. The discovery of water on the distant planet left scientists (A) _____ and sparked a series of (B) _____ investigations into the possibility of life beyond Earth.

1. (A) intrigued (B) ongoing
2. (A) exhausted (B) completed
3. (A) disappointed (B) abandoned
4. (A) confused (B) concluded

17. The villagers became increasingly (A) _____ as the _____ river threatened to overflow its banks after several days of heavy rainfall.

1. (A) relieved (B) receding
2. (A) alarmed (B) rising
3. (A) delighted (B) shrinking
4. (A) satisfied (B) flowing

18. Having _____ the evidence collected from the excavation site, the researchers presented their findings to an _____ audience of historians.

1. (A) examined (B) assembled
2. (A) ignored (B) departing
3. (A) misplaced (B) scattered
4. (A) rejected (B) wandering

19. The _____ forests provide shelter to numerous endangered species, while the _____ areas around them continue to face serious environmental threats.

1. (A) protecting (B) developed
2. (A) threatened (B) flourishing
3. (A) abandoned (B) preserved
4. (A) protected (B) developing

20. The painting, _____ for more than a century in a private collection, was recently displayed in a museum, attracting _____ visitors from around the world.

1. (A) concealed (B) fascinated
2. (A) displayed (B) departing
3. (A) damaged (B) discouraging
4. (A) ignored (B) reluctant

✱ **Verb Tense Sequence and Agreement**

Select the correct option for each question.

21. Manual testing protocols, _____ by QA engineers before major deployment cycles, ensure that software modules remain _____ without relying solely on automated scripts.

1. which systematically are reviewed; functional and secure both
2. which systematically is reviewed; both functional and secure
3. which are systematically reviewed; both functional and secure
4. systematically which are reviewed; functional and secure both

22. While traditional manufacturing processes contrast sharply with modern automated systems, several _____ can still be executed without complex digital infrastructure. Unquestionably, these hybrid models rely on methods that are _____.

1. manufacturing models which digitally are controlled; cost-effective and scalable both
2. manufacturing models which is digitally controlled; both cost-effective and scalable
3. manufacturing models which are digitally controlled; both cost-effective and scalable
4. digitally manufacturing models which are controlled; cost-effective and scalable both

23. By the time the rescue team arrived, the villagers _____ to a safer location.

1. had moved
2. have moved
3. are moving
4. will move

24. Although qualitative research _____ from quantitative approaches, researchers often construct frameworks that are _____ to collect data without relying exclusively on large numerical datasets.

1. which statistically is differentiated; both flexible and rigorous
2. which is statistically differentiated; both flexible and rigorous
3. which statistically are differentiated; flexible and rigorous both
4. statistically which is differentiated; flexible and rigorous both

25. The scientist stated that the results _____ different if the experiment had been conducted under controlled conditions.

1. will be
2. have been
3. are being
4. would have been

26. In modern agriculture, _____ against seasonal pests allow farmers to reduce synthetic fertilizer application while cultivating crops that are _____.

1. crop varieties which naturally are protected; resilient and sustainable both
2. crop varieties which naturally is protected; both resilient and sustainable
3. naturally crop varieties which are protected; resilient and sustainable both
4. crop varieties which are naturally protected; both resilient and sustainable

27. Offsite data storage options, _____ across global data centers, provide secure backup solutions so that organizations can deploy architectures that are _____ without maintaining extensive physical hardware on site.

1. which securely are encrypted; public and private both
2. securely which are encrypted; both public and private
3. which are securely encrypted; both public and private
4. which securely is encrypted; public and private both

28. Fixed monetary policies contrast with flexible exchange rate mechanisms, but economies _____ can avoid frequent central bank interventions while keeping markets _____.

1. which are globally standardized; both stable and dynamic
2. which globally are standardized; stable and dynamic both
3. which globally is standardized; both stable and dynamic
4. globally which are standardized; stable and dynamic both

29. If the conservation measures had been implemented earlier, several endangered species _____ from extinction.

1. may have been saved
2. would have been saved
3. will be saved
4. were saved

30. Rarely _____ scientists encountered such contradictory evidence during a single investigation.

1. have
2. has
3. did
4. were

*** Phrasal Verbs**

Select the correct option for each question.

31. The archaeologists had to _____ the excavation after heavy rainfall made the site unsafe.

1. carry out
2. call off
3. look into
4. bring about

32. The researchers were unable to _____ the source of the contamination despite conducting several tests.

1. track down
2. turn down
3. break down
4. put down

33. The ancient tradition gradually _____ as younger generations moved away from the village.

1. gave away
2. took over
3. died out
4. passed on

34. The scientist _____ the possibility that the unusual results had been caused by experimental error.

1. ruled out
2. ran into
3. put off
4. came across

35. While examining the old manuscripts, the historian _____ a previously unknown reference to the ancient settlement.

1. came down
2. came over
3. came apart
4. came across

36. The government has promised to _____ stricter regulations to protect endangered species.

1. break into
2. bring in
3. turn over
4. take after

37. The speaker's argument did not _____ when the audience examined the evidence more critically.

1. hold up
2. hold on
3. hold back
4. hold out

38. The researchers _____ an unexpected pattern while analyzing the historical data.

1. came up with
2. came down with
3. came across
4. came along

39. The committee decided to _____ the meeting until more reliable evidence was available.

1. put out
2. put off
3. put through
4. put aside

40. The researchers are trying to _____ why the population of bees has declined so rapidly.

1. figure out
2. figure in
3. figure on
4. figure up

✱ **Quantifiers**

Select the correct option for each question.

41. Although the expedition had _____ supplies remaining, the team decided to continue because the destination was only a few kilometres away.

1. A few
2. little
3. much
4. a little

42. Only _____ participants were willing to disclose their personal experiences during the survey.

1. much
2. a little
3. a few
4. little

43. _____ of the ancient artifacts discovered at the site were damaged beyond repair.

1. Much
2. Several
3. A great deal
4. Little

44. There are _____ reliable accounts of what happened during the final days of the expedition, making the historical record difficult to reconstruct.

1. a little
2. few
3. much
4. a great deal of

45. The researchers spent _____ time analyzing the data, but their efforts eventually produced a significant breakthrough.

1. many
2. a number of
3. a great deal of
4. few

46. Despite having _____ opportunities to reconsider the decision, the committee refused to change its position.

1. much
2. little
3. a little
4. several

47. The archaeologists found _____ traces of human settlement in the region, suggesting that the area may have been inhabited only briefly.

1. little
2. a little
3. a few
4. much

48. There isn't _____ information available about the origins of the manuscript, and several theories remain speculative.

1. much
2. a few
3. many
4. several

49. The speaker provided _____ examples to illustrate the concept, but none of them directly addressed the students' main concern.

1. much
2. a little
3. several
4. little

50. _____ of the population in the remote region still depends on traditional farming for its livelihood.

1. Many
2. A significant proportion
3. Few
4. Several

✳ **Relative Pronouns and Sentence Correction**
Select the correct option for each question.

51. The archaeologist _____ discovered the ancient inscription believes that it may alter our understanding of the civilization.

1. whom
2. whose
3. who
4. which

52. The manuscript, _____ origins remain uncertain, contains references to a previously unknown kingdom.

1. whom
2. whose
3. which
4. that

53. The village _____ the researchers stayed during the expedition had remained largely isolated for decades.

1. which
2. where
3. whose
4. whom

54. The scientist _____ the committee consulted had previously conducted extensive research on the subject.

1. which
2. whose
3. whom
4. where

55. The theory _____ the researchers proposed was initially rejected but later gained widespread acceptance.

1. whom
2. where
3. whose
4. that

56. The village _____ traditions have survived for centuries attracts researchers from around the world.

1. which
2. whose
3. whom
4. what

57. The historian interviewed several witnesses _____ had lived in the region during the conflict.

1. who
2. whose
3. which
4. whom

58. The painting _____ was discovered in the abandoned building is believed to be several centuries old.

1. who
2. whom
3. which
4. whose

59. The professor _____ we invited to deliver the lecture has published several influential books.

1. which
2. whom
3. whose
4. who

60. The ancient temple, _____ walls were covered with elaborate carvings, attracted thousands of visitors.

1. whose
2. which
3. whom
4. who

✳ **Parallel Structure and Participle Modifiers**
Select the correct option for each question.

61. Effective communication requires employees to be both _____ and _____.

1. attentive and responding
2. attentive and responsive
3. attention and responsive
4. attentively and response

62. The expedition was challenging, requiring the researchers to be both _____ and _____.

1. patient and resourceful
2. patience and resourceful
3. patiently and resourceful
4. patient and resourcefulness

63. The new environmental policy aims at _____ waste and _____ energy consumption.

1. reducing and conserving
2. reduction and conserving
3. reducing and conservation
4. reduce and conserving

64. The historian was interested not only in _____ ancient records but also in _____ oral traditions.

1. examination and documenting
2. examining and documentation
3. examining and documenting
4. examine and document

65. The lecture was designed to help students develop critical thinking, evaluate evidence, and _____ logical conclusions.

1. drawing
2. draw
3. drawn
4. to drawing

66. The researchers discovered several artifacts _____ beneath the ruins and _____ remarkably well despite their age.

1. buried and preserved
2. burying and preserving
3. buried and preserving
4. burying and preserved

67. The conservation project focuses on _____ endangered species, _____ their habitats, and _____ local communities.

1. protection, restoring, and educating
2. protecting, restoration, and educating
3. protect, restore, and educating
4. protecting, restoring, and educating

68. The ancient manuscripts, _____ for centuries in a remote monastery, were finally _____ by historians.

1. preserved and examined
2. preserving and examining
3. preserved and examining
4. preserving and examined

69. The scientist's findings were both _____ and _____, challenging several long-standing assumptions.

1. unexpectedly and significant
2. unexpected and significance
3. unexpected and significant
4. unexpectedly and significantly

70. _____ by severe drought and _____ by rising temperatures, the region experienced a significant decline in agricultural production.

1. Affecting and threatening
2. Affected and threatened
3. Affected and threatening
4. Affecting and threatened

✱ **Contextual Vocabulary & Semantics**

Select the correct option for each question.

1. Although the company enjoyed substantial revenue growth, its inability to (A) _____ operational inefficiencies continued to (B) _____ profitability, leaving its long-term financial (C) _____ increasingly (D) _____.

1. (A) rectify (B) constrain (C) sustainability (D) precarious
2. (A) amplify (B) enhance (C) liquidity (D) robust
3. (A) conceal (B) stimulate (C) viability (D) certain
4. (A) replicate (B) stabilize (C) productivity (D) advantageous

Answer: 1

2. The manager's proposal was initially met with (A) _____ from senior executives, who considered the projected benefits too (B) _____ to justify the substantial investment and feared that the initiative could (C) _____ organizational (D) _____.

1. (A) enthusiasm (B) tangible (C) strengthen (D) cohesion
2. (A) skepticism (B) speculative (C) disrupt (D) equilibrium
3. (A) consensus (B) measurable (C) improve (D) efficiency
4. (A) approval (B) evident (C) facilitate (D) coordination

Answer: 2

3. To remain competitive, organizations must not merely (A) _____ emerging technologies but also (B) _____ their implications, anticipate potential (C) _____, and incorporate them into a coherent strategic (D) _____.

1. (A) reject (B) minimize (C) opportunities (D) obstacle
2. (A) imitate (B) overlook (C) advantages (D) hesitation
3. (A) postpone (B) exaggerate (C) solutions (D) decline
4. (A) adopt (B) evaluate (C) disruptions (D) framework

Answer: 4

4. The research findings challenge the widely held assumption that higher salaries automatically (A) _____ employee motivation, suggesting instead that recognition and autonomy may have a more (B) _____ influence on workplace (C) _____ and long-term (D) _____.

1. (A) undermine (B) negligible (C) dissatisfaction (D) stagnation
2. (A) restrict (B) superficial (C) productivity (D) absenteeism
3. (A) enhance (B) profound (C) engagement (D) retention
4. (A) distort (B) temporary (C) compliance (D) resistance

Answer: 3

5. The entrepreneur's ability to (A) _____ limited resources, (B) _____ strategic partnerships, and (C) _____ market uncertainty enabled the startup to achieve remarkable (D) _____ despite intense competition.

1. (A) squander (B) dissolve (C) intensify (D) vulnerability
2. (A) leverage (B) forge (C) navigate (D) growth
3. (A) deplete (B) terminate (C) disregard (D) stability
4. (A) conceal (B) undermine (C) eliminate (D) decline

Answer: 2

6. Effective workplace (A) _____ enables employees to (B) _____ ideas clearly and build professional (C) _____ with their (D) _____.

1. (A) communication (B) express (C) relationships (D) colleagues
2. (A) decoration (B) hide (C) arguments (D) competitors
3. (A) hesitation (B) avoid (C) confusion (D) customers
4. (A) isolation (B) exchange (C) conflicts (D) managers

Answer: 1

7. The sudden decline in sales prompted the management to (A) _____ the underlying causes, (B) _____ its pricing strategy, and (C) _____ measures to regain customer confidence.

1. (A) overlook (B) preserve (C) abandon
2. (A) speculate (B) maintain (C) postpone
3. (A) investigate (B) reassess (C) implement
4. (A) conceal (B) simplify (C) undermine

Answer: 3

8. The company's expansion into international markets required it to (A) _____ cultural differences, (B) _____ its communication practices, and (C) _____ its approach to local consumers.

1. (A) disregard (B) standardize (C) restrict
2. (A) navigate (B) adapt (C) tailor
3. (A) eliminate (B) preserve (C) imitate
4. (A) exaggerate (B) simplify (C) generalize

Answer: 2

9. The manager's decision to _____ the conflicting opinions rather than _____ them demonstrated his ability to maintain organizational _____.

1. (A) intensify (B) resolve (C) conflict
2. (A) provoke (B) accommodate (C) tension
3. (A) exaggerate (B) negotiate (C) disagreement
4. (A) reconcile (B) suppress (C) harmony

Answer: 4

10. Effective crisis management requires leaders to (A) _____ credible information, (B) _____ uncertainty among stakeholders, and (C) _____ decisive measures without appearing (D) _____.

1. (A) disseminate (B) mitigate (C) implement (D) impulsive
2. (A) suppress (B) intensify (C) postpone (D) transparent
3. (A) distort (B) eliminate (C) reconsider (D) accountable
4. (A) conceal (B) generate (C) abandon (D) methodical

Answer: 1

✱ **Participle Forms**

Select the correct option for each question.

11. The hikers reached the _____ (A) village after walking through a _____ (B) forest for several hours.

1. (A) isolated (B) dense
2. (A) isolating (B) density
3. (A) isolate (B) densifying
4. (A) isolation (B) densely

Answer: 1

12. The _____ (A) manuscript, _____ (B) for centuries in a monastery, revealed details about a forgotten civilization.

1. (A) preserving (B) hidden
2. (A) preserved (B) having hidden
3. (A) preserved (B) hidden
4. (A) preserving (B) having been hidden

Answer: 3

13. _____ (A) by the unexpected announcement, the audience remained _____ (B) throughout the ceremony.

1. (A) Surprised (B) silent
2. (A) Surprising (B) silence
3. (A) Shock (B) silently
4. (A) Astonishment (B) silenced

Answer: 1

14. _____ (A) the potential danger, the climbers proceeded cautiously along the _____ (B) path.

1. (A) Recognition (B) narrowing
2. (A) Acknowledged (B) narrowness
3. (A) Awareness (B) narrowed
4. (A) Recognizing (B) narrow

Answer: 4

15. After the earthquake struck the region, thousands of residents were left (A) _____ by the sudden destruction and struggled to cope with the (B) _____ conditions around them.

1. (A) fascinated (B) improving
2. (A) encouraged (B) recovering
3. (A) devastated (B) deteriorating
4. (A) relieved (B) flourishing

Answer: 3

16. The discovery of water on the distant planet left scientists (A) _____ and sparked a series of (B) _____ investigations into the possibility of life beyond Earth.

1. (A) intrigued (B) ongoing
2. (A) exhausted (B) completed
3. (A) disappointed (B) abandoned
4. (A) confused (B) concluded

Answer: 1

17. The villagers became increasingly (A) _____ as the _____ river threatened to overflow its banks after several days of heavy rainfall.

1. (A) relieved (B) receding
2. (A) alarmed (B) rising
3. (A) delighted (B) shrinking
4. (A) satisfied (B) flowing

Answer: 2

18. Having _____ the evidence collected from the excavation site, the researchers presented their findings to an _____ audience of historians.

1. (A) examined (B) assembled
2. (A) ignored (B) departing
3. (A) misplaced (B) scattered
4. (A) rejected (B) wandering

Answer: 1

19. The _____ forests provide shelter to numerous endangered species, while the _____ areas around them continue to face serious environmental threats.

1. (A) protecting (B) developed
2. (A) threatened (B) flourishing
3. (A) abandoned (B) preserved
4. (A) protected (B) developing

Answer: 4

20. The painting, _____ for more than a century in a private collection, was recently displayed in a museum, attracting _____ visitors from around the world.

1. (A) concealed (B) fascinated
2. (A) displayed (B) departing
3. (A) damaged (B) discouraging
4. (A) ignored (B) reluctant

Answer: 1

*** Verb Tense Sequence and Agreement**

Select the correct option for each question.

21. Manual testing protocols, _____ by QA engineers before major deployment cycles, ensure that software modules remain _____ without relying solely on automated scripts.

1. which systematically are reviewed; functional and secure both
2. which systematically is reviewed; both functional and secure
3. which are systematically reviewed; both functional and secure
4. systematically which are reviewed; functional and secure both

Answer: 3

22. While traditional manufacturing processes contrast sharply with modern automated systems, several _____ can still be executed without complex digital infrastructure. Unquestionably, these hybrid models rely on methods that are _____.

1. manufacturing models which digitally are controlled; cost-effective and scalable both
2. manufacturing models which is digitally controlled; both cost-effective and scalable
3. manufacturing models which are digitally controlled; both cost-effective and scalable
4. digitally manufacturing models which are controlled; cost-effective and scalable both

Answer: 3

23. By the time the rescue team arrived, the villagers _____ to a safer location.

1. had moved
2. have moved
3. are moving
4. will move

Answer: 1

24. Although qualitative research _____ from quantitative approaches, researchers often construct frameworks that are _____ to collect data without relying exclusively on large numerical datasets.

1. which statistically is differentiated; both flexible and rigorous
2. which is statistically differentiated; both flexible and rigorous
3. which statistically are differentiated; flexible and rigorous both
4. statistically which is differentiated; flexible and rigorous both

Answer: 2

25. The scientist stated that the results _____ different if the experiment had been conducted under controlled conditions.

1. will be
2. have been
3. are being
4. would have been

Answer: 4

26. In modern agriculture, _____ against seasonal pests allow farmers to reduce synthetic fertilizer application while cultivating crops that are _____.

1. crop varieties which naturally are protected; resilient and sustainable both
2. crop varieties which naturally is protected; both resilient and sustainable
3. naturally crop varieties which are protected; resilient and sustainable both
4. crop varieties which are naturally protected; both resilient and sustainable

Answer: 4

27. Offsite data storage options, _____ across global data centers, provide secure backup solutions so that organizations can deploy architectures that are _____ without maintaining extensive physical hardware on site.

1. which securely are encrypted; public and private both
2. securely which are encrypted; both public and private
3. which are securely encrypted; both public and private
4. which securely is encrypted; public and private both

Answer: 3

28. Fixed monetary policies contrast with flexible exchange rate mechanisms, but economies _____ can avoid frequent central bank interventions while keeping markets _____.

1. which are globally standardized; both stable and dynamic
2. which globally are standardized; stable and dynamic both
3. which globally is standardized; both stable and dynamic
4. globally which are standardized; stable and dynamic both

Answer: 1

29. If the conservation measures had been implemented earlier, several endangered species _____ from extinction.

1. may have been saved
2. would have been saved
3. will be saved
4. were saved

Answer: 2

30. Rarely _____ scientists encountered such contradictory evidence during a single investigation.

1. have
2. has
3. did
4. were

Answer: 1

✳ **Phrasal Verbs**

Select the correct option for each question.

31. The archaeologists had to _____ the excavation after heavy rainfall made the site unsafe.

1. carry out
2. call off
3. look into
4. bring about

Answer: 2

32. The researchers were unable to _____ the source of the contamination despite conducting several tests.

1. track down
2. turn down
3. break down
4. put down
